COMMERCIAL PILOT CERTIFICATE

Rev. 02/04/2020

The Commercial Pilot Certificate allows a pilot to accept Pay for transporting passengers or cargo (when complying with FAR PART 135 or 121.) The certificate is required for other pilot positions such as flight instruction, banner towing, and aerial photography. The certificate never expires. The flight training must include operations in an aircraft with retractable landing gear, flaps and a constant speed propeller (complex aircraft.) This training fine tunes piloting skills. Minimum age requirement is 18 years and the course, based on 2-3 sessions per week, is normally about two months.

THE FAA HAS SPECIFIC REQUIREMENTS

MINIMUM 250 HOURS – TOTAL FLIGHT TIME (MAX 50 HRS IN SIMULATOR)

- 100 HRS IN POWERED AIRCRAFT – 50 HRS IN AIRPLANES
- 100 HRS PILOT IN COMMAND
